Barry -- If any college representatives are in attendance with dual roles and have research IT workstations or servers the following information details on administrative access to your research systems and upcoming AIT's information meetings

- First link: website page of AgriLife IT Website goes over administrative compliance and security. Discusses who is impacted, how they are impacted, and what they need to do.
 - <https://firstcallhelp.tamu.edu/knowledge-base/administrative-access-and-compliance-security-monitoring/>
- Second link: details
 - <https://firstcallhelp.tamu.edu/knowledge-base/agrilife-computer-administrator-account/#steps-to-request-administrative-access>
 - The administrative access is only granted to the departmental computers that are joined to the Agnet domain. For research computers (computers that are asset tagged 06) Those computers systems are not joined to the domain unless you as the PI that manages your IT.
 - The administrative access is going to be granted back at the local level for the system. So, every Pi will have an administrative account for every single PC. They can now know what the access level the computer has and can retrieve the data

In the chat:

06 Research –
